

Isaiah Fasoldt

Software Engineer

I'm a problem solver, a life-long learner, and an adventure seeker. After teaching for five years, I left education because I was looking for a field that better utilized my analytical gifts. Computer programming is that field. I'm leaving the Iron Yard with skills and a mindset that will make me an asset. I'm excited to contribute and learn new things. I'm looking for a collaborative environment where I can receive direct, consistent feedback, and help build life-changing technology.

SKILLS

- Ruby
- Ruby on Rails
- JavaScript
- React
- jQuery
- HTML/CSS/Bootstrap
- Postgresql
- Git/Github

EXPERIENCE

The Iron Yard, Indianapolis, IN

Studied Ruby on Rails in an immersive three month back-end engineering course. Built numerous web applications, including www.salt-up.com, a community-centered meal hosting platform.

Executive Board, All Angels Episcopal Church, New York, New York (2014-2016)

Served on the executive board overseeing and casting vision at a large church and its associated foundation. Managed assets in the tens of millions of dollars.

Teach For America, Jill Chaifetz Transfer High School, New York, New York (2011-2016)

Co-ran the special education department at a small public school in the South Bronx. Reformed the curriculum and structures, leading special education students to higher achievement than their general education peers.

EDUCATION

M.S. in Adolescent Special Education, City University of New York (2014)

B.A. in Philosophy, Ancient Languages, History, Wheaton College (2011)
